Note.—Tables it and is are based upon the records of the Commonwealth Meteorologist. The divisions correspond approximately with the statistical divisions shown on the map in frontispiece of the Official Year Book of New South Wales, each division being subdivided into two sectors indicated by the letters N, S, E or W according as they constitute the northern, southern, eastern or western portion of the division concerned. Normal Rainfall is based on a period ended 1929.

# No. 12.—Rainfall Index—Weighted Average Ratio of Actual to Normal Rainfall (New South Wales).

Normal Rainfall for each month = 100.

<sup>\*</sup> Represents gross value at place of production less value of goods used in the process of production, e.g., fodder, seed, fertiliser used on farms, and raw materials and fuel in factories.

<sup>†</sup> Calendar years 1938 to 1953.

<sup>‡</sup> Excludes profits realised under the wartime plan for disposal of the 1939-40 to 1945-46 wool clips. Five distributions of such profits have been made, viz., £9,423,000 in 1949-50, £9,423,000 in 1951-52, £6,027,000 in 1952-53, £6,241,000 in 1953-54, and £4,891,000 in 1954-55.

#### No. 36.—Building Approved—Value of New Buildings, Alterations and Additions. Areas of New South Wales-Private and Government.

- Note. I. "Value" represents the estimated cost of the building when completed (exclusive of the land).
  - 2. Building is classified as "Private" or "Government" according to ownership.
  - 3. The value of building approved is the value of permits issued by local government councils, plus the value of contracts let or work commenced and day labour projects authorised by governmental authorities.
  - 4. Buildings on rural holdings are for the most part excluded.

#### No. 45,-Retail Trade-Total Value of Sales in New South Wales.

(Source: Commonwealth Statistician.)

Statistics for 1947-48 and 1948-49 were compiled from returns supplied by each retail establishment in the State, but statistics for subsequent periods are based on returns collected from a representative sample of retail establishments. These preliminary figures may be revised when details of a complete census of sales for the year 1952-53 are available.

Particulars in Table 45 relate to the retail sales of goods (as distinct from services accommodation, entertainments, meals, etc.) by establishments selling retail goods from fixed premises (shops, rooms, kiosks, yards) and include the retail sales of establishments principally engaged in wholesale, manufacturing or servicing activities.

#### No. 88.—Stock Exchange Index (Sydney).

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales.

The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £1 of paid-up capital. The aggregate index is the average of all the shares included in the groups with the addition of 24 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their part relies of interest the index. to their par values, adjustment being made where capital is written off or bonus shares are issued.

Average for Period.	Manufactur- ing and Distributing Companies.	To Retail Companies.	8 Public Utility Companies.	Pastoral and Finance Companies.	Insurance Companies.	Total 75 Companies.	Active Share included in foregoing.

### "Sydney and Suburbs".

On 1st January, 1954, the boundaries of the Statistical Metropolis as defined from 1933 were extended to embrace the Municipalities of Fairfield and Holroyd and the Shires of Sutherland and Warringah, together with portions of the Municipality of Liverpool and of the Shires of Baulkham Hills, Blacktown and Hornsby. In Tables 90 and 93, the group "Sydney and Suburbs" differs from the Statistical Metropolis because it includes particulars for the whole of the Municipality of Liverpool and the whole of the Shires of Baulkham Hills, Blacktown and Hornsby.

### No. 95 .- Employment in New South Wales-Wage and Salary Earners in Civil Employment, Governmental and Private.

(1) Particulars in Tables 94 and 95 are estimates based on the Census of 1933 and subsequent quasi-censuses (e.g., Civilian Register, 1943, and Occupation Survey, 1945), and returns supplied monthly by governmental authorities, and since July, 1941, by employers for purposes of Commonwealth Pay-roll Tax.

(2) The number of employees recorded on Pay-roll Tax returns relates to those whose names appeared on the last pay-roll of the month irrespective of whether they were actually working

at the end of the month.

(3) Working proprietors, wage earners in rural industry, females in private domestic service, members of full-time defence forces at home or abroad, National Service Trainees in camp, and Government "relief" workers are not included.

# No. 96.—Employment in Larger Private Factories, New South Wales.

In order to provide a prompt indication of the trend of employment in private factories, a survey of employment in 628 larger privately-owned factories in New South Wales is made each month, by joint arrangement between the Secretary of the Department of Labour and National Service and the Acting Commonwealth Statistician. Approximately half of total factory employment is covered by the collection, the results of which are available one month earlier than the particulars of total factory employment shown in Table 94.

#### No. 99.—Export Price Index-Numbers-Australia.

(Compiled by the Commonwealth Statistician.)

These index-numbers are compiled from the prices of 20 commodities which normally constitute about 80 per cent. of all exports. For some metals, and for wheat (from July, 1945, to September, 1951), the index of prices is deduced from the average value of current sales or shipments and hence shows some irregularity. In this index the prices of the commodities are weighted by the average annual exports (production in the case of gold) during the three years, 1933-34 to 1935-36.

(Base of each section: Average of 3 years ended June, 1939 = 100.)

### No. 100.—Wholesale Price (Basic Materials and Foodstuffs) Index-Numbers.

(Compiled by the Commonwealth Statistician.)

Commodities in this index are priced in their primary or basic form wherever possible. The prices used in this index have in the main been obtained directly from manufacturers and merchants, and, with a few important exceptions, from Melbourne sources. Apart from locally produced building materials and one or two minor commodities, however, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on estimates of the average annual consumption of the commodities in Australia during the years 1928–29 to 1934–35 inclusive.

(Base: Average 3 years ended June, 1939 = 100.)
